

## eVoucher Solution

To stay competitive, it is imperative that Agri Finance embrace cutting edge technology. This translates into ushering in a digitalised experience for end-customers through use of eVouchers.

Revolutionising Agri Finance  
the technology way

Digitalised uniform  
records for  
multi-party access

Prompt transaction  
processing with  
inventory management

Better monitoring by  
Government bodies

## KEY FEATURES

### Farmer - Easy Information Access

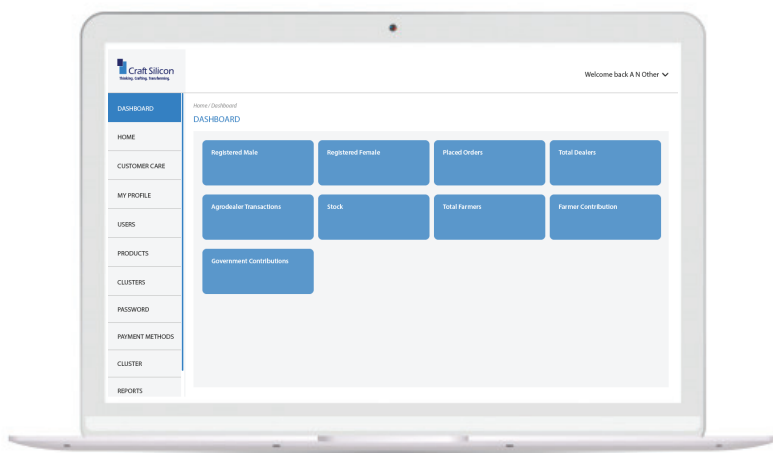

Farmers can conveniently view item information on eVoucher from various approved agro-dealers, add items to a cart for purchase and check out successfully, top-up the virtual wallet on eVoucher and redeem monetary value against goods.

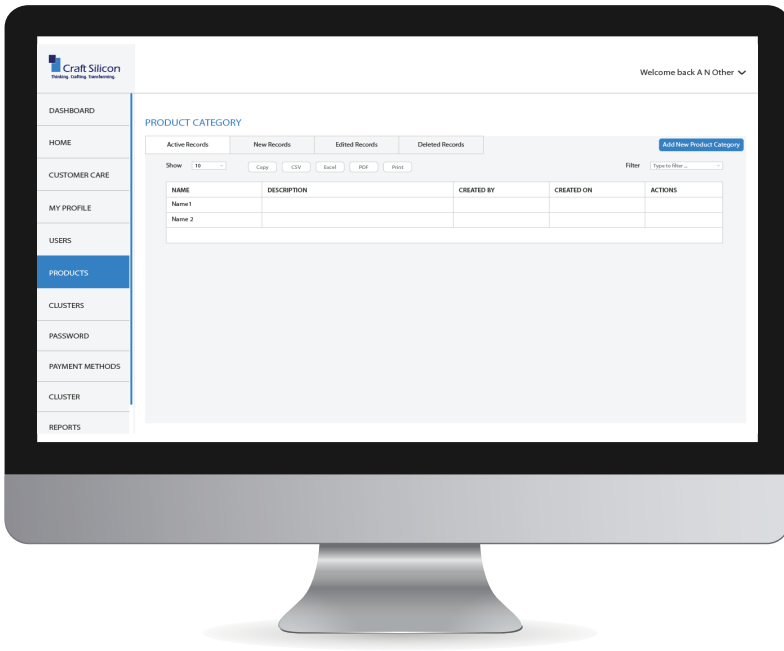

### Agro-dealer - Convenient Digital Transactions

An agro-dealer can add agro-input approved by the third-party via barcode / QR code scanning, sell agro-inputs exclusively to regional farmers and receive payment from the government float account maintained at the bank upon farmer confirmation of agro-input receipt.

### Government Staff/ System Administrators / Bank Agents - Efficient Data Management

Government bodies can verify and upload pre-approved farmer & agro-dealer data, maintain regions and cluster groups for agro-dealers and farmers, along with access to crop cycle information.

eVoucher Solution, an innovative concept in Agri Finance, enables equivalent digital financial value for end-customers to buy goods and acquire services.

## KEY BENEFITS

Grow your agri business with transformational technology

Increased agricultural production & productivity

Increased access to critical farm inputs

Improved agricultural markets and value addition for the prioritised commodities

Institutionalisation & enabling strengthening of the environment
